DecideMeal
1. Introduction
- While preparing a meal, the biggest question for a chef is "what to cook? ". Thus, website major targets are chefs that are unable to decide ("what to cook?"). The website will randomly generate a cuisine for the chef with all the ingredients listed required with instructions required to prepare it as well as video on cooking it.
- Goals: Help in decision making, simplicity and easily accessible.
- Benefits: Saves time for making decisions and time for searching for instructions elsewhere. For organizations such as Restaurants, the user can order the meal

2. Expected List of Features
1. 1-Click- The website will generate random meal in the click of a single button
2. Video tutorial payback: The user can watch instructions video on the website
3. Responsive Web page: The website will be built for all screen sizes

3. Market Survey
- Name Generator (https://www.name-generator.org.uk/)
  The site generates Character Name, Rapper Name, Quick Name, Nickname, Rap Lyrics, Band Name, Username, Fantasy Name, Story and Freestyle Song Lyrics for the user with a bunch of user choices required.
- Recipe Roulette (http://www.reciperoulette.tv/)
  This site generates a random meal and the UI of this site consists of roulette which spins when generating a meal for the user.
- Random Word Generator (https://randomwordgenerator.com/)
